

HowTo

You first need to make Google Form as per below reference form.

<https://forms.gle/wmq13DhDwfcecMWi6>

Then enable Google Sheets with it and go to Google Sheets where data is being stored,

Go to **File > Publish to the Web**

Then select, **Form Responses 1, Web page and publish**, copy the **link** and try opening it in the browser to verify, like this

https://docs.google.com/spreadsheets/u/1/d/e/2PACX-1vQFNtWF9w_Wt3v6E_u7RkpOc6Qy654EndqgdaZBGECLk-18O4mEtIJe7KnD3IT-HV8Ctq_p1TbyWf4/pubhtml?gid=1289366372&single=true

Then open Excel “**Excel VBA Chess v1.05 25Nov2020.xlsm**” code and in the **SheetLink** tab paste that Google Sheet Web link in cell “**A1**” and save it.

Go to the VBA Chess Sheet and press the “**Fetch Form Data**” button to pull the latest Google Sheets data and it will be stored in “**Form Data**” Sheet.

After each move from either Black or White you’ll be notified in email with **current board positions state and algebraic notations**.

For **Demo** and more info, you can watch this video thanks.
